

# The Walking Stick

Wandering through the Alps requires the perfect walking stick.

We are constantly rummaging through our forest and debris piles to look for the perfect walking stick.

The most perfect walking stick mustn't be too long or too short. It should be fairly strait but a little curve makes it even better.

Ah here's the perfect stick. And now look how happy he is.

We peel the bark off of our sticks and occasionally will sand the rough spots. You can put a veneer or varnish on them but we like to use the natural wood. We have quite a collection of sticks which along with walking also make great forts when stacked together.

Ok ....it's time to head to the mountains with Heidi. Have fun!
