

Water Slingshot

Knowing that we are going to have some incredibly fun water games coming up in a couple of days, we thought it best to prepare one of the needed items today.

Some years ago we discovered the art of hurling water balloons via a slingshot. We thought it would be a great tool in pirate warfare and have a great game planned which uses this.

Supplies: For each slingshot you will need

- One large funnel
- 8 feet of surgical tubing
- Thin rope
- Two washers
- A drill

- Make two marks on each side of the funnel.
- Choose a drill bit which will make a hole big enough to fit the tubing through.
- Drill the holes.

Cut the tubing into four foot lengths.

Put one cut end of the tubing into one hole and tie a knot.

Put the other end of the tubing into the hole right next to it and tie a knot.

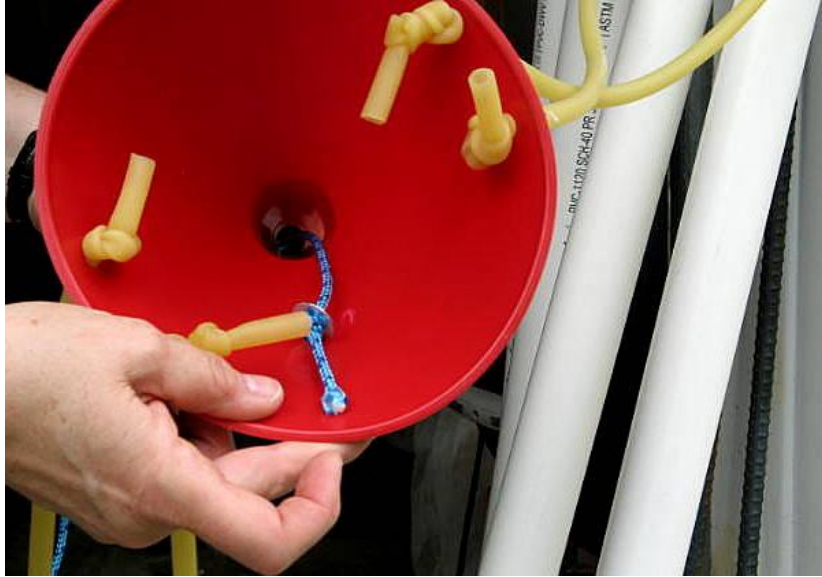

Do the same for the other side.

Take your string place it through the funnel hole.

Place a washer on the string and knot the end.

Now put a washer on the other end of the string and tie a knot. This will be your handle to launch your slingshot from.

If you don't make the stand, you will need three people to launch the water balloons. One on each side and another to pull the string and the funnel back to release the balloon.
